

# MONTHLY WEATHER REVIEW.

MARCH, 1894.

PROF. CLEVELAND ABBE, EDITOR.

## CONTENTS.

	Page.		Page.
INTRODUCTION .....	99	WIND .....	117
Data used in preparing this REVIEW.		Prevailing directions; Resultant winds; High winds; Local storms.	
CHARACTERISTICS OF THE WEATHER .....	99	ATMOSPHERIC ELECTRICITY .....	119
ATMOSPHERIC PRESSURE .....	99	Thunderstorms; Auroras; Earth currents and magnetic storms.	
General remarks; Normal pressure; Diurnal variation; Departures; High areas; Low areas; Movements of centers.		STATE WEATHER SERVICES.....	122
NORTH ATLANTIC METEOROLOGY.....	104	Extracts and summaries from reports of the several services.	
Normal conditions; North Atlantic storms; Ocean fog; Ocean ice.		INLAND NAVIGATION.....	124
TEMPERATURE OF THE AIR .....	106	Stage of water in rivers; Floods; Navigation.	
General remarks; Normals; Monthly means; Departures; Years of highest and lowest mean temperature; Maximum and minimum temperature; Accumulated temperature; Diurnal periodicity; Monthly and daily ranges; Limits of freezing weather; Periods of high and low temperature; Frost; Cold waves; Temperature and agriculture.		OBSERVATIONS ON THE GREAT LAKES.....	124
PRECIPITATION .....	110	SUNSHINE AND CLOUDINESS .....	125
General remarks; Normals; Departures; Accumulated precipitation; Years of greatest and least precipitation; Excessive precipitation; Maximum rainfall; Frequency of heavy precipitation; Exceptional precipitation; Monthly snowfall; Special snowfall, March 25-30, 1894; Depth of snow on ground; Hail; Fog; Sleet; Wet and dry periods.		NOTES BY THE EDITOR .....	126
		METEOROLOGICAL TABLES.—I. Climatological data, Weather Bureau stations; II. Meteorological record, voluntary observers; III. Canadian data; IV. Sunshine; V. Temperature; VI. Pressure; VII. Wind; VIII-IX. Resultant wind.....	129-147
		CHARTS—I. Tracks of centers of low areas; II. Isobars, isotherms, and prevailing winds; III. Total precipitation; IV. Tracks of centers of high areas; V. Monthly snowfall and limits of freezing weather; VI. Depth of snow lying on the ground; VII. Departures from normal temperature for March 25-31; VIII. Magnetic storm of March 29-30.
